

AMENDMENTS TO THE CLAIMS:

1-27. (cancelled)

28. (previously presented) A wireless microphone system comprising:

at least one antenna unit having an antenna and a circulator or an HF isolator being connected to the antenna;

said antenna and said circulator or said HF isolator being arranged in a common housing of the antenna unit; and

wherein the antenna unit can be plugged in or screwed on such that the antenna unit is replaceable as a unit.

29. (previously presented) The wireless microphone system as set forth in claim 28, further comprising a hand transmitter microphone or a pocket transmitter microphone as well as a receiver, and wherein at least one antenna unit is plugged in or screwed on to the hand transmitter microphone or the pocket transmitter microphone as well as to the receiver.

30. (previously presented) A pocket transmitter microphone, comprising:

at least one antenna unit having an antenna and a circulator or an HF isolator being connected to the antenna;

said antenna and said circulator or said HF isolator being arranged in a common housing of the antenna unit; and

wherein the antenna unit can be plugged in or screwed on such that the antenna unit is replaceable as a unit.

31. (previously presented) A hand transmitter microphone, comprising:

at least one antenna unit having an antenna and a circulator or an HF isolator being connected to the antenna;

said antenna and said circulator or said HF isolator being arranged in a common housing of the antenna unit; and

wherein the antenna unit can be plugged in or screwed on such that the antenna unit is replaceable as a unit.

32. (previously presented) The wireless microphone system as set forth in claim 28, wherein said at least one antenna unit is tuned to a given frequency range.

33. (previously presented) A wireless microphone device, comprising:
a receiving device having at or in its high frequency input an antenna unit having an antenna said and a circulator or an HF isolator being connected to the antenna;
said antenna and said circulator or said HF isolator being arranged in a common housing of the antenna unit; and
wherein the antenna unit can be plugged in or screwed on such that the antenna unit is replaceable as a unit.

34. (previously presented) The wireless microphone device as set forth in claim 33, wherein the antenna unit is tuned to a given frequency range.

35. (previously presented) An HF transmitter, comprising:
at least one antenna unit having an antenna and a circulator or an HF isolator being connected to the antenna;
said antenna and said circulator or said HF isolator being arranged in a common housing of the antenna unit; and
wherein the antenna unit can be plugged in or screwed on such that the antenna unit is replaceable as a unit.

36. (previously presented) The HF transmitter as set forth in claim 35, wherein the antenna unit comprises a visible identification, coding or color marking indicating the given frequency range.
